	Did I take the opportunity?	yes	no	yes	n.a.	no	no	no				
	Comments	ambiguity on open being 3 ticks near value	Learned about: "Late sustained auction entry" - the reason why I didn't take the opportunity is I didn't want to break rules in my process. If I had known about the entry setup I would have taken it.	Being in drawdown caused me to take quicker profits, but did well to 1) take the trade, 2) take profits, 3) jump back in on a second trade and consequently bank profits on that as well	n.a.	ambiguity on open being 3 ticks near value	Due to open inside value I did not risk taking a trade based on hypo 2 this late in the month, plus M15 consolidation at D1-C-D 2.00208	Did not take the trade due to being outside of trading window

	Did I take the opportunity?				n.a.	no	no	no				

	Comments				n.a.	Did not take the trade due to being outside of trading window	- new to DAX, - late in the month, - optimal entry would have been early entry during IB technically it wasn't in my trading window because I am normally not in my seat	the move happened going short, then another opportunity arose that under current process rules I could not have taken but learned how equities work different than FX and commodities.
